

# Class Information

## Year R

### Summer 2 2025

Welcome to Summer 2 and our new knowledge topic -

The Sea

I hope you find the following information helpful in supporting your child this half term.

Many thanks for your continued support.  
Miss Osborne

#### Reading books

As we progress through our phonics curriculum the children will either bring home a reading book, a ditty (with short sentences or text to read) and/or a blending book. These will be based on their current ability level in phonics.

- PLEASE send your child's book bag, blending books and reading books to school every day in order that we can hear your child read when we have time.

#### Library books

The children have thoroughly enjoyed visiting the library each **TUESDAY** and we will continue to do so. Children need to return their previous book **on or before Tuesday** in order that they can choose a new book to take home.

#### Homework challenges

Please explore the homework challenge menu for this half term. Photos of evidence can be posted on Class Dojo. It is always so lovely to see the children's efforts and to see them feeling so proud of what they have created.

#### PE

PE will be on a **WEDNESDAY** this half term. Please make sure that children come to school wearing full PE kit on this day. Please cover or remove earrings and hair should be tied back.

Please contact me via Dojo if you have any questions or concerns about your child.

Thank you very much,

Miss Osborne

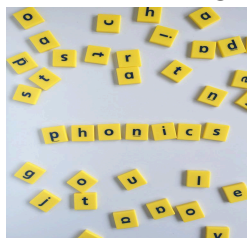

## Year R: Term 3

### English

We will be continuing to learn stories using actions in order to be able to retell them. We will write sentences and create our own pieces of work based around the story. This half term our story is The Rainbow Princess.

### Phonics

We will continue to follow 'Read, Write Inc' as a method of learning our phonic sounds. Children work in a range of groups dependent on their ability.

### Maths

This half term we will be reviewing foundational skills linked to number and place value, addition and subtraction. We will also be learning about measurement (time), 2D and 3D shapes, and we will explore pattern.

### Discovery RE

We will be learning about homes around the world and asking the question: what makes places special? We will look at pictures of religious homes and houses from around the world. We will make comparisons to our own homes and have a try at building some different houses using different materials.
